

60 Ton Blast Freezing System

ARESCO, Inc. - Worldwide Leader in Industrial Refrigeration

ARESCO, Inc.

ARESCO, Inc. - Worldwide Leader in Industrial Refrigeration

Complete 60 Ton System

This remarkable system was removed from a turkey plant that closed. All equipment was originally installed in 1993, but has not run for over 5 years. All of the equipment is designed to work together in perfect concert.

The equipment and controls were removed by our experienced crews, and all electronics, starters, and disconnects were carefully boxed and marked for easy re-installation. The blast coils were capped and charged with nitrogen.

Controls, Vessels, Pumps, Compressors, Evaporators

Economical Two Stage Operation

3—20 Ton Imeco FCLS 4083-2-5 Blast Coils w/RS Valve Banks
1—36" Suction Accumulator w/two **Reconditioned** Cornell Pumps and all valves
1—36" Intercooler with all valves
1—30" Receiver with all valves
1—**Reconditioned** Vilter 456 High Stage Compressor
1—**Reconditioned** Vilter 4512 Booster Compressor
1—**New** Baltimore Aircoil Condenser
* All Valves, Controls, Starters, and Disconnects Included.
Net Ex Works: \$ 190,000 USD

How Else Can We Help You?

ARESCO has been a leader in the industrial refrigeration field since 1984. With five innovative United States patents, and more ground breaking designs on the way, you couldn't find a more capable partner.
